

RUTHMANN
HIGHquality

Drive fast, smooth actions – with the RUTHMANNSTEIGER® K 130.

As local company you must be in a position to adapt yourself to most different operating conditions during work at lighting systems, traffic lights or road signs. Within

moving traffic you can often only work under very restricted space conditions. And even then you have to take care that the traffic does not come to a standstill. With

the **RUTHMANNSTEIGER® K 130** you get a maximum of flexibility for most different conditions at place of work.

RUTHMANNSTEIGER® K 130

Thanks to the swivelling angle of the Rüssel® (cage lifting arm) you obtain the necessary agility to reach with the working cage also hardly accessible spots like e.g. behind wirings or contact wires.

With a cage carrying capacity of up to 200 kg you can realize with the platform on a safe and fast way working heights of up to 13,00 metres. This STEIGER® covers for you with its lateral outreach of 8,20 metres a large working range. The small jacked width makes a safe working also within urban traffic and narrow streets possible to you.

A further plus of stability arises for you thanks to the high permissible siting inaccuracy of the carrier chassis of 5°. In this way also at working sites with a gradient or slope of up to 9% a safe stability is granted to you.

The standard version of this STEIGER® is mounted on a carrier-chassis. In case of a high demand for transportation of tools and mounting material you can order as optional extra for the load platform a storage compartment with a lot of additional space.

Contact us – by phone, fax or E-mail. We would be pleased to give you detailed information concerning the performance spectrum of our proven STEIGER® and demonstrate profit and advantages arising for you.

RUTHMANNSTEIGER® K 130

Working height:	13,00 m
Lifting height:	11,00 m
Lateral outreach:	8,20 m
Range of rotation:	450°
Swivelling angle of articulated top boom Rüssel®:	160°
Size of working cage:	1,30 - 1,00 m
Carrying capacity of working cage:	200 kg
Permissible siting inaccuracy:	5°
Total height:	3,50 - 3,60 m
Perm. total weight:	from 4.600 kg

Load of working cage up to 200 kg

All dimensions in meters. All measurements and weights are approximate and refer to the standard basic execution. Technical alterations reserved. Steiger®, Gelenksteiger®, and Rüssel® are registered trademarks of Anton Ruthmann GmbH & Co. KG
